PROFESSIONAL EXPERIENCE

LANDING

Remote - Portland, OR

Lead Engineer

2022-2023

Senior Software Engineer

2021-2022

- Partnered & integrated with Airbnb, syncing over 2000 homes, generating additional revenue daily.
- Promoted within 12 months due to strong performance and impact.
- Managed a cross-functional team of 12, focused on Marketing & Growth initiatives.
- Implemented Optimizely, allowing for rapid rollout of dozens of experiments, including visual overhauls, pricing algorithm changes, feature rollouts, and feature experimentation.
- Owned and collaborated on algorithmic changes to pricing and inventory with the goal of balancing needs to increase & reduce onhand inventory.
- Developed a geo-boundary system for sort & search results to produce vastly more relevant results.

BLACKBIRD LOGISTICS

Hybrid-Remote - Reno, NV and Delray Beach, FL

Senior Software Engineer

2019-2021

- Led marketing initiatives, leveraging my history in marketing to lead various campaigns and develop and expand user personas.
- Focused on Sort & Search, User Experience, Pricing, and Tax Reporting in e-commerce development.
- Mentored 2 developers and 2 QA team members, resulting in the promotion of 1 developer and the successful offloading of automated testing from Engineering to QA.
- Managed large projects around pricing transparency and meeting cannabis regulatory requirements.

NOBLEST STUDIOS

On-site - Reno, NV

Technical Director

2018-2019

Lead Developer

2012-2018

- Managed 100+ projects, primarily focused on e-commerce, marketing, and CMS websites. Clients included Autodesk, Google, Tahiti Tourisme, Yosemite National Park, University of California, and more.
- Led a team of 15 engineers, directly responsible for growth, strategy, and hiring.
- Streamlined technologies, resulting in a 30% reduction in operating costs.
- Frequently involved in contract negotiations, RFP responses, sales pitches, and retainers.
- Acted as a full-stack individual contributor on projects while handling leadership responsibilities.
- Created and evolved technical requirements, roadmapping, and estimates.
