EXPERIENCE

Senior Staff Software Engineer - Ridgeline

Aug 2024 - Present | Portland, Oregon (Remote)

Senior Staff engineer on the UI Platform organization, spanning UI Experience (design-system components and implementation) and UI Framework (services, APIs, orchestration, tooling, and workflows that power front-end delivery across the company).

- Lead architecture and engineering design for systems with organization-wide impact, guiding long-term technical direction across UI and platform teams.
- Own the health, quality, and evolution of shared front-end platforms, services, and developer tooling used by multiple product teams.
- Drive cross-team alignment on standards, workflows, and architectural decisions through Ridgeline's Architecture Advice Process.
- Identify and remove technical bottlenecks that limit delivery speed, reliability, or developer productivity.
- Serve as the technical representative for platform systems that span multiple teams and business domains.
- Deliver and evolve large initiatives end-to-end, including planning, rollout, contracts, and long-term maintenance.
- Mentor and sponsor engineers, helping grow future technical leaders while raising the bar for engineering excellence.
- Contribute to hiring, interviewing, and community-building, strengthening Ridgeline's engineering culture and talent pipeline.

Lead Software Engineer - Landing

Sep 2022 - Nov 2023 | Portland, Oregon (Remote)

- Led the Supply and Demand engineering group for a marketplace business, owning lead acquisition, conversion, and growth systems.
- Managed and grew a team of ~12 engineers, including promotions, hiring, and performance management.
- Partnered with executive leadership on roadmap planning, delivery risks, and business outcomes.
- Drove major performance and conversion improvements through experimentation, analytics, and platform modernization.
- Evaluated and negotiated with external technology vendors.

Senior Software Engineer - Landing

Apr 2021 - Sep 2022 | Remote

- Led a growth engineering team of 6 across multiple codebases.
- Owned A/B testing infrastructure and experimentation strategy.
- Built multi-channel automation pipelines for revenue and lifecycle marketing.

Senior Software Engineer - Blackbird

May 2019 - Apr 2021 | Reno, Nevada (Hybrid)

Growth and marketing platform engineer for a vertical SaaS product covering POS, inventory, and delivery.

- Drove lead conversion strategy and growth experimentation.
- Owned automated testing infrastructure and partnered closely with QA to raise release quality.

Technical Director - Noble Studios

Jul 2012 - May 2019 | Reno, Nevada

Digital marketing agency focused on travel and tourism. Ran the engineering department.

- Led an engineering team of 15 across multiple concurrent client projects.
- Worked directly on major brands including Airbnb, Autodesk, Google, Tahiti Tourisme, Yosemite National Park, and University of California.
- Actively participated in sales and bidding, contributing directly to revenue generation.
- Streamlined development practices, accelerating time to production.
- Led high-risk projects to successful completion, including engagements with SLA contracts.

Web Developer - Lab Analytix

Mar 2012 - Jul 2012 | Reno, Nevada

Built custom web-based laboratory information management software (LIMS) with CRM, workflow tracking, data collection, and client portal integration.

Web Developer - DealerTrend, Inc.

Apr 2010 - Mar 2012 | Reno, Nevada

Full stack development for automotive dealership inventory marketing platforms, with a focus on SEO, scalability, and CMS ownership.

Lead Web Developer - Vitamin Research Products

Sep 2009 - Apr 2010 | Carson City, Nevada

- Immediate initiatives upon hiring resulted in a 75% increase in online performance.
- Established stringent specifications for online marketing, including appearance, data validation, and compliance standards.
- Led a complete rebuild and rebrand of the company's digital presence.
- Implemented DVCS and DevOps practices to support a growing development team.

Web Developer - Exyst Inc.

May 2008 - Jul 2009 | Reno, Nevada

Full stack development at a web development startup, with a focus on ExpressionEngine, client relationships, and server administration.

Software Engineer - Mark Systems

Dec 2006 - May 2008 | Reno, Nevada

Built ERP software for the agriculture and construction industry, including inventory management, CRM, reporting, and accounting.

- Owned and developed the CRM module end-to-end.
- Built an automated screen scraper to gather and convert leads.

Web Developer - Great Basin Internet Services

May 2005 - Dec 2006 | Reno, Nevada

PHP-based CMS and e-commerce development at an ISP and web shop. Responsibilities included server management, systems administration, and direct client work.
